

BUSINESS SALES PERFORMANCE ANALYTICS

Data Science & Analytics Internship

Prepared By:

Praveen Patil

Organization:

Future Interns

CIN ID:

FIT/JUN26/DS20519

Project Duration:

June 2026 – July 2026

Tools Used:

SQL, Power BI, Microsoft Excel

Submission Date:

July 2026

EXECUTIVE SUMMARY

This project focuses on analyzing business sales performance using SQL and Power BI. The objective was to identify revenue trends, product performance, regional sales distribution, customer satisfaction levels, and target achievement rates.

Key Findings

- Total Revenue Generated: **₹7.32 Million**
- Top Performing Product: **Jeans**
- Best Performing Region: **South**
- Target Achievement Rate: **78.6%**
- Average Customer Rating: **3.81**

The analysis revealed strong business performance, effective sales strategies, and positive customer satisfaction levels. The insights obtained from this project can help management make informed decisions regarding inventory management, marketing strategies, and regional expansion.

KPI SUMMARY

KPI	Value
Total Revenue	₹7.32M
Total Units Sold	285
Top Product	Jeans
Best Region	South
Achievement Rate	78.6%
Average Customer Rating	3.81

1. Introduction

Business Sales Performance Analytics is a data-driven project aimed at evaluating sales performance across products, regions, and time periods. The objective is to identify revenue trends, top-performing products, regional contributions, customer satisfaction levels, and target achievement rates. The analysis helps businesses make informed decisions to improve profitability and operational efficiency.

2. Dataset Overview

The dataset contains business sales information including:

- Product Name
- Sales Revenue
- Units Sold
- Region
- Customer Rating
- Target Achievement Status
- Discount Information
- Monthly Sales Data

The dataset was analyzed using SQL for querying and Power BI for visualization and reporting.

3. Revenue Analysis

Finding

The total revenue generated during the analysis period was **₹7,827,525**.

Business Insight

The business generated substantial revenue, indicating healthy market demand and effective sales operations across multiple products and regions.

Recommendation

Focus on retaining existing customers and increasing sales of high-performing products to sustain long-term revenue growth.

4. Product Performance Analysis

Finding

Product-wise revenue generated:

Product	Revenue (₹)
Jeans	3,283,509
Shirt	2,517,405
Jacket	2,026,611

Business Insight

Jeans contributed the highest share of total revenue, making it the company's strongest-performing product category.

Recommendation

Increase inventory availability and promotional campaigns for Jeans while identifying opportunities to improve sales of Jackets.

5. Monthly Revenue Trend Analysis

Finding

Sales revenue fluctuated across different months, with Month 2 recording the highest sales performance while Month 5 showed the lowest revenue generation.

Business Insight

The variation in monthly sales suggests seasonal demand patterns and changing customer purchasing behavior throughout the year.

Recommendation

Implement targeted promotional campaigns during low-performing months and analyze factors that contributed to peak sales periods.

6. Target Achievement Analysis

Finding

- Targets Achieved: 22
- Targets Not Achieved: 6

Business Insight

The majority of business targets were successfully achieved, indicating strong operational performance and effective sales strategies.

Recommendation

Study successful sales campaigns and replicate those strategies across all regions and product categories.

7. Customer Satisfaction Analysis

Finding

18 customer ratings were above 3.5, indicating positive customer feedback regarding product quality and service.

Business Insight

Customer satisfaction levels are generally favorable, which contributes to repeat purchases and brand loyalty.

Recommendation

Continue collecting customer feedback and address any recurring concerns to further improve customer experience.

8. Regional Performance Analysis

Finding

Regional sales performance:

Region	Revenue (₹)
South	2,373,555
North	2,049,285
East	1,904,245
West	1,500,440

Business Insight

The South region generated the highest revenue and represents the company's strongest market. The West region contributed the lowest sales.

Recommendation

Expand successful sales and marketing strategies from the South region into lower-performing regions to improve overall business performance.

9. Discount Performance Analysis

Finding

The business provided discounts to customers while maintaining strong revenue generation. Revenue after discounts remained positive, demonstrating effective pricing and discount strategies.

Business Insight

Strategic discounting helped drive customer purchases without significantly affecting overall profitability.

Recommendation

Continue using targeted discounts for customer acquisition while monitoring their impact on profit margins.

10. Business Impact

This analysis enables businesses to identify top-performing products, evaluate regional sales performance, monitor customer satisfaction, and measure target achievement. The insights generated support data-driven decision-making and help improve operational efficiency, profitability, and future business planning.

11. Conclusion

This analysis evaluated business sales performance across products, regions, customer satisfaction metrics, and target achievement indicators. The findings revealed that Jeans were the top-performing product, the South region generated the highest revenue, and most business targets were successfully achieved. Overall, the business demonstrates strong sales performance and customer satisfaction levels. By focusing on high-performing products, optimizing regional strategies, and maintaining customer-centric practices, the company can further enhance growth and profitability.

12. Dashboard Visualizations

Figure 1: Business Sales Analytics Dashboard

BUSINESS SALES ANALYSIS DASHBOARD			
TOTAL REVENUE	TOTAL UNIT SOLD	AVG CUSTOMER RATING	ACHIEVEMENT RATE
₹ 7,319.6K	285	3.81	75.86%
